Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)			
Office Action Comments	10/596,555	NIEBLING ET AL.			
Office Action Summary	Examiner	Art Unit			
	Thomas R. Hannon	3656			
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

2) Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date Notice of Informal Patent Application					
Paper No(s)/Mail Date 6) Other:					

The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject mater of claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the groove 2k as annular as described in the specification. Any structural detail that is essential for a proper

Application/Control Number: 10/596,555

Art Unit: 3656

Page 3

understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d).

Different embodiments must not be shown in the same figure.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to

the Office action to avoid abandonment of the application. Any amended replacement drawing

sheet should include all of the figures appearing on the immediate prior version of the sheet,

even if only one figure is being amended. The figure or figure number of an amended drawing

should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure

must be removed from the replacement sheet, and where necessary, the remaining figures must

be renumbered and appropriate changes made to the brief description of the several views of the

drawings for consistency. Additional replacement sheets may be necessary to show the

renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The

objection to the drawings will not be held in abeyance.

The disclosure is objected to because of the following informalities:

On page 13, lines 10-11 are not understood.

On page 14, line 20, "7b" should be --7a--.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-12, 14, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 is indefinite and unclear with respect to the phrase "in the process".

Claim 14 is indefinite, as it positively refers to plural "the rows", whereas claim 1 only positively defines "at least one row".

Claim 16 is indefinite as it lacks a proper antecedent for "the wheel flange" in line 5.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 13, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Griseri et al. US 2002/0015545. Griseri discloses a wheel bearing (16) in a wheel carrier (10), the wheel bearing (16) having at least one outer ring (18), having at least one row of rolling bodies (19a, 19b), the wheel bearing (16) being supported in the wheel carrier (10) at least on a cylindrical section (24) of the outer ring (18) at least radially with respect to the rotational axis, and the outer ring (18) having a flange (25a, 37) which points radially away from the rotational axis, characterized in that a raceway for the row is formed at least partially on the section (24), and in that the flange (25a, 37) is formed axially on the end side of the outer ring (18), the flange being fastened axially to the wheel carrier (10). The flange is fastened by means of the opposite flange 26a. With respect to claim 2, these claim features are inherent in the interference fit set forth in Griseri et al. With respect to claims 3, 4, and 6, the patentability of a product does not

Art Unit: 3656

depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). With respect to claim 5, the wheel bearing of Griseri includes at least one inner ring (17) having a raceway. With respect to claim 13, the flange bears against the wheel carrier, which corresponds to "at least in sections". With respect to claim 14, a radial shoulder (at 23) is formed in one piece with the outer ring between the rows. With respect to claim 16, Griseri further discloses in that the wheel carrier (10) engages around at least the raceway of the outer ring (18), a hub (cylindrical portion of 10) being supported in the outer ring (18) via the rolling bodies (19a, 19b) on the raceway in such a way that it can rotate about the rotational axis, and a wheel flange (11) leading radially from the hub.

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
